EXPERIENCE

COFOUNDER/PRODUCT MANAGER
Beautiful Ruins, August 2018-Present

An ecommerce store featuring nourishing oil blends. As we grow, we plan to add products and develop methods to allow for customized oil blends. www.shopbeautifulruins.com

- Initiated a product pivot to implement agile methodology and create a minimum viable product.
- Quickly addressed issues that arose during product development.
- Product manager end-to-end, from conception to launch.

CIVIL ENGINEER
WSP, November 2019-December 2020

- Wrote product requirements and iterated based on team and stakeholder feedback.
- Managed workflow for indirect reports on design team to complete 100% design.

CIVIL ENGINEER
HDR, July 2018-October 2019

- Developed multiple proofs of concept (POC) for New York City Parks that received client buy-in.
- Coordinated with subcontractors to obtain data necessary for design decisions.
- Collected and utilized existing conditions data to extrapolate viable locations for proposed tolling infrastructure in NYC.

CIVIL ENGINEER
Tetra Tech, July 2016-June 2018

- Analyzed 100+ flooding data points and created 35 POCs, each with unique features to alleviate flooding.
- Created a tracking and monitoring plan to measure program success once products are constructed.
- Managed the process and production of 35 POCs between two Engineering teams and Marketing.

EDUCATION

BACHELOR OF SCIENCE, ENVIRONMENTAL ENGINEERING
Rutgers University, 2011-2016

SUMMARY

A data driven professional with proven cross functional leadership and organizational skills, aiming to leverage my abilities to successfully fill the Product Manager role at your company.

I have framed my civil engineering experience in terms of product to draw attention to my product management skills.
